

2010 Tide Calendar

Narragansett Bay

Rhode Island

**Narragansett Bay
Research Reserve**

The Narragansett Bay Research Reserve Celebrates 30 Years of Research, Education and Stewardship.

The **Narragansett Bay Research Reserve** is one of 27 Reserves in the National Estuarine Research Reserve System (NERRS). This network of protected areas was established for long-term research, education and stewardship of estuaries; where rivers meet the sea. The NERRS is a partnership program between the National Oceanic Atmospheric Administration (NOAA) and the coastal states, and it protects more than one million acres of estuarine land and water around the nation.

The 2010 Narragansett Bay Tide Calendar highlights the 27 National Estuarine Research Reserves around the country that provide essential habitat for wildlife; offer educational opportunities; and serve as living laboratories for scientists.

Chesapeake Bay NERR, Maryland

Grand Bay NERR, Mississippi

Jacques Cousteau NERR, New Jersey

Narragansett Bay NERR, Rhode Island
